Re: Request for waiver from certification testing for the purpose of re-certification, Certificate 56-16

This letter is an official application for the renewal of certification of appliances for the model, True North TN 40 Insert model, pellet wood heater, manufactured by Pacific Energy Fireplace Products Ltd. The unit is currently certified under letter number 56-16

The heaters in this model line continue to be similar in all material aspects that would affect emissions to the representative model submitted for testing on which the original certificate of compliance was based. The model line continues to comply with all the requirements of the certification pursuant to the 2015 NSPS for New Residential Hydronic Heaters and Forced Air Furnaces at 40CFR Part 60, subpart AAA (2015 NSPS). We request that the agency waive any requirements for re-certification testing.

Regards,

Jeff Bain | Product Development Manager
